

TUVALU: PLACES IN TODAY'S NEWS

Tuvalu is threatened by rising sea levels, with projections indicating that half of the main atoll, Funafuti, could be submerged by 2050.

- Tuvalu is a small island nation in the Pacific Ocean, consisting of nine atolls.
- With a population of around 11,000, it is one of the world's least populous countries.
- The economy relies on fishing, agriculture, and remittances, while its culture is deeply rooted in Polynesian traditions.
